

Experienced Estimator / Project Manager (Concrete / Civil)

Currently we are in need of an experienced estimator/project manager who has at least 10 years' experience estimating, bidding, and project managing all aspects of projects involving all manner of concrete construction. This includes footings, foundations, slabs (on grade & elevated), pavement, curb/gutter, sidewalks, utilities, excavation, aggregates and etc. Moreover, since OBCI is invested in the HCSS Heavy Bid program, the applicants understanding of this program will weigh heavily in the hiring process.

In addition to the technical knowledge and understanding of the concrete/civil industry, the candidate must have great soft skills, work well with a team, and enjoy achieving personal goals in a fast paced and challenging environment. The general duties that this position must perform includes, but is not limited to:

- Pre-bid activities
- Bidding & Sales
- Project Management
- Customer Relations
- Business Development

The minimum qualifications that we are looking for include the following:

- At least 10 years' experience estimating, bidding, and project managing concrete and civil projects
- Bachelor's degree in construction-related field is preferable, but not mandatory
- Exceptional skills in HCSS Heavy Bid, HCSS Heavy Job, and In-Site on screen take-off
- Team-oriented with the ability to communicate with team members and management
- Must be able to work in high pressure situations facing strict deadlines
- Detail and accuracy oriented

Reports to: Structural/Civil/Heavy/Highway Division Manager
